High Glossy Finished Door

Strategically located within the suburban industrial zone of Rajkot - the seventh fastest growing city in the world known for its excellence in engineering, glittering success in ornaments and business acumen - FM Industry is spread across 4 acres of land. Our state-of-the-art manufacturing facility boasts of having the most modern machinery, advance technology and next-gen equipment to produce the best-in-class range of Domestic Flour Mill with a price range that caters to almost every segment of Indian society.

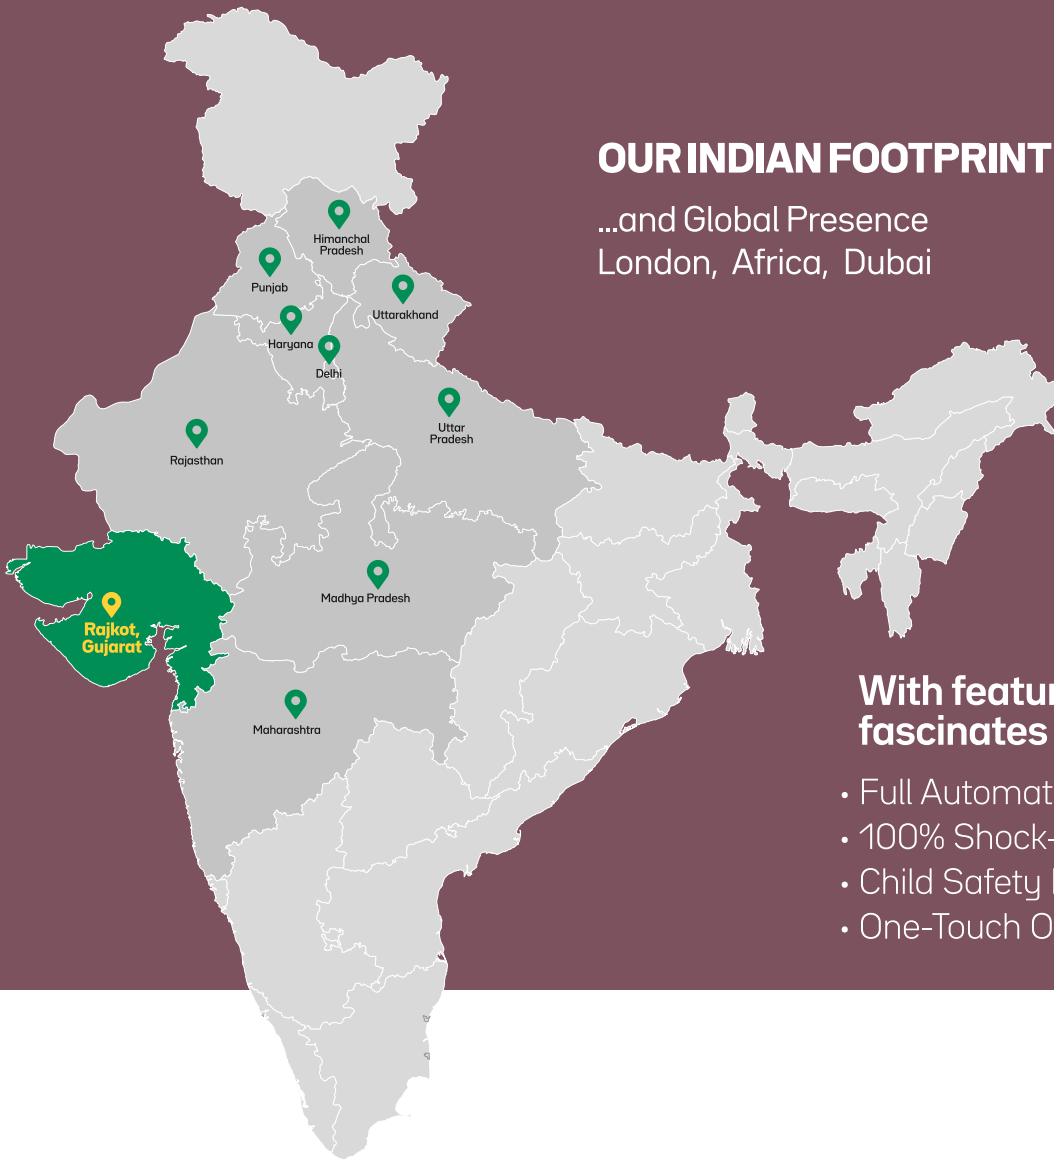

An ISO 9001:2015 company, we are a professionally managed entity with an unwavering focus on serving our customers with highly cost-effective products carrying the quality standards that meets the global standards. Our fully independent manufacturing assembly consists of having a super efficient ensemble of manpower, machine and mindset to deliver more than what we promise. More than 70% of manufacturing operations are done in-house that results into superlative products at surprisingly affordable price for our loyal customers.

## **Asia's Largest and Most Modern Plant - at a glance!**

- Fully equipped R&D Department managed by qualified personnel to meet the future demands with innovative products
- 1,00,000 sq. ft of integrated Manufacturing Assembly with imported latest technology machines.
- Latest Motor Body Turning Machinery to produce 100% Copper Wire motor that adheres to ISI Lab standards
- Fully-equipped Finishing Department comprising of the latest machinery for Anti scratch mirror finish door, hi-tech machine for 3D Digital Printing

## OUR INDIAN FOOTPRINT

...and Global Presence  
London, Africa, Dubai

### With features that fascinates India!

- Full Automatic
- 100% Shock-proof
- Child Safety Lock equipped
- One-Touch Operation

**ATTA CHAKKI**

### IRRESISTIBLE USP's

- Eco-friendly Wooden Body
- Product Warranty from 1 to 2 Years
- Anti-scratch Layer Door
- Water-proof Mirror Finish Door
- Digitally Printing on Doors
- 100% Copper Motor  
[Guarantee of 5 to 12 years]
- ISI 996 Power Saver Motor
- Super Diamond Cut (DATI) Cutter
- Fully SS Washable Net [in commercial]

### Always a step ahead.... that's FM GROUP!

with a keen eye on the horizon of growth, we have a consolidated and dedicated family of over 350+ that work in harmony to fulfill the current need and be ready for the future demands. The ever-ready FM family consists of Super Stockists, Distributors and Dealer in addition to the dedicated force of Service Engineers, Marketing Managers, and Sales Representatives across 10 states. So far, we are having OEM tie-ups with more than 10 leading brands in India and are in the process of expanding this network to other Indian states to capture 50% market share by 2030. As a part of our Total Delight policy for consumers, we propose finance options like Bajaj Finance, Pine Labs, IDFC, and HDB for them.

## DIE CASTING MACHINE

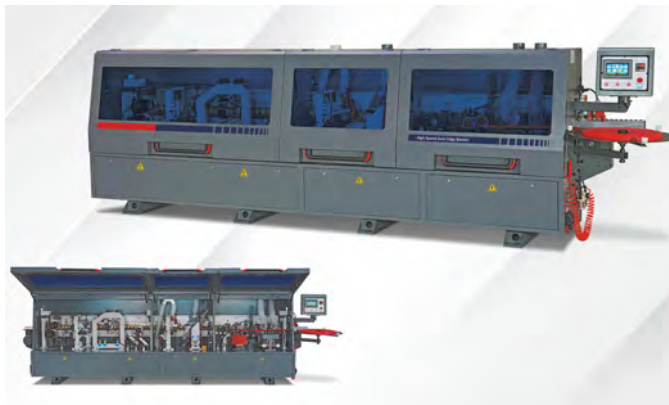

- In die casting, a precision metal mold (die) is filled with molten metal at high speed under high pressure, instantly forming a product (casting). The raw materials used such as aluminum
- Die casting is characterized by high dimensional accuracy and allows for the mass production of thin-walled products like to dram, motor body, varam, etc. with complex shapes. Die casting also has the advantage of producing smooth casting surfaces requiring less machining after molding.
- Die casting is an automated casting process that forces liquid metal under high pressure (150 to 1200 bar) into a mold cavity at a high filling speed. This type of casting offers uniform quality to the component produced. it is typically used when a high volume of production and when quality, a consistent part is needed.
- Die casting is an automated casting process that forces liquid metal under high pressure (1150 to 1200 bar) into a mold cavity at a high filling speed. This type of casting offers uniform quality to the component produced. it is typically used when a high volume of production and when quality, a consistent part is needed.

- World Class Design Printing
- Full HD Multicolour Print
- Imported high resolution metal raster to reduce mechanical error, to get the moving resolution of the carriage to 0.01mm.
- To realize high printing quality demand of the customers.
- Double screw rods, double servo Motorsto keep high accurating of stepping.
- Ricoh Gen5 printheads, pulse driven, the gray scale printing technology cancontrol the ink dot at 7-35pl.  
Imported high resolution reducer to keep the high accurating step.

## AUTOMATIC MULTICOLOUR DIGITAL PRINTING MACHINE
